**Special Economy Price for Customers in India: INR 29,000 (MRP: INR 36000)**

Originated in India as Moksha Patam, this historic game emphasizes the role of fate,

destiny or karma. The game has also been interpreted & used as a tool for teaching the effects of good deeds versus bad.

The ladders represented virtues such as generosity, faith & humility while the snakes represented vices such as lust, anger, murder & theft. The morality lesson of the game was that a person can attain salvation through doing good, whereas by doing evil one will inherit rebirth to lower forms of life.

*Traditional family board game can be enjoyed by all the members whilst they are on the move. For travel purpose, the board is fitted inside the handy carry case which has a compartment for the pegs & the die.*

Originated in India by the name Ashtapad, this ancient game has historical references in India where chess was used as a tool to teach military strategy to Indian princes. That is probably how chess acquired its nickname: the Royal Game.

Great Rulers of India like Shivaji Maharaj & Maratha Peshwas had mastery in Chess. Till recently, Indian freedom fighters like Lokmanya Tilak & Swatantrya Veer Savarkar were known to be Chess experts.

### **Good quality Wood undergoes the following processes**

1. Deconing - Decontamination of wood by drying to remove humidity - 10 days
2. Cutting & shaping & drying - 10 days
3. Polishing & drying - 10 days
4. Painting & drying to prevent wood from decaying - 10 days
5. Epoxy coating to make waterproof & heatproof & drying - 10 days

All pieces are available in Black, Brown, Wooden & White colours & Chess Board is available in Green-White or Black-White colours

**Guarantee:** Don't worry about maintaining our products. The **Babul wood** contains **oil** which greatly contributes to its water resistance. This element alone allows teak to avoid the decaying & infesting by insects to which many other woods are subject.

**Wood is the choice for garden Chess pieces not just because it is beautiful, but because it is also strong & durable can withstand any weather. We create with the highest ornamental craftsmanship.**

### Contents:

1. **1 Vinyl Board:**Wrinkle free, waterproof, weightless & foldable board extremely compact for quick easy setup & storage ideal for use indoors or outdoors.
2. **32 unbreakable wooden Coins**

**Price: USD 120**

**Special Economy Price for Customers in India: INR 11,000 (MRP: INR 15000)**

**HOW TO PLAY**  
 This game can be played between 2 to 4 players. Players start from home. Whoever reaches 144 first is the winner.  
 The die is rolled. The player has to move by the same number of steps that comes up on the die. Once the player reaches a number, he/she is allowed to jump to next number of the same category. For example, in the beginning, if the player gets 4 dots on the die, he/she will move to number 4, but 4 being a square number he/she is allowed to jump to the next square number i.e. 9.  
 There are certain numbers which have two or more than two properties. Here the player has a chance to move as per his/her choice. For example, if the player after throwing the die reaches the number 64. The number 64 is a composite number, also a square number as well as cube number. The player has a multiple choice. He/she can go to next composite number 66, or to next square number 81 or to next cube number 125.  
 But, in case of prime number, the player has to go one step backward in same category. For example, if a player comes to number 13, then he has to go back to earlier prime number i.e. number 11.  
 If the number is both prime as well as Fibonacci then he/she has the choice to go forward to the next Fibonacci number or to the previous prime number.  
 After 144: What are the next Prime numbers? What are the next Square numbers? What are the next Composite numbers? What are the next Cube numbers? What are the next Fibonacci numbers?

**Favorite game of all Math's teachers which improves Mathematics of children**

## Basic Concept of the game

**If a player lands on a prime number '3', he advances to the next prime number which is 5. Similarly, if he lands on a square number 4 he gets advanced to the next perfect square which is 9.**

**Students develop problem-solving abilities & essential math skills**

**Make them familiar with concepts of addition subtraction square numbers Cube Numbers prime numbers Composite Numbers & Fibonacci Numbers.**

**And what is the best way to develop a liking for Math's than by playing a mathematical game?**

### Contents:

- The game is quite easy, but winning is a definite challenge&need skill & strategy to think ahead.
- You can connect any two dots which are next to each other, either horizontally or vertically.
- If you have managed to join two dots together which form the last side of a four-sided box, your color will fill the box, indicating that it belongs to you.
- You will be able to make one connection per move, but if you have created a box, you will get an extra free move before the other player take its turn.
- You can get an unlimited number of free moves, so if you manage to create another box in any free move, then you can keep going until you are unable to create a further box.
